

SPARK GREEN GENERATOR PROGRAM

Our small-scale micro-generators have rate plan options to choose from and our green generators can sell their wholly owned renewable energy attributes of their exported energy as Green Energy Offsets to our customers through our Green Offset Program when the categories are open. See our website for details!

HOW DOES IT WORK?

You Choose the Micro-Gen Rate Program that Suits You Best... and We Do the Rest. Your options include the **Spark Solar Smart** program, the **Solar-Powered Irrigation Rate** program, the **Small-Scale Year-Round High-Rate Plan**, or **One of the Year-Round Fixed Low-Rate Plans (Low 1-Yr, or Low 2-Yr, or Low 3-Yr, or Low 5-Yr)**.
